**Naples Botanical Garden Announces its 2022 – 2023 Season  
Mexico: A Celebration of Plants & Culture**

**NAPLES, FL – September 15, 2022** – Naples Botanical Garden announces its most ambitious programming to date, a yearlong exploration of Mexico’s plants and their cultural connections. The season features major art exhibitions — including a botanical homage to artist Frida Kahlo — new festivals, and the return of annual favorites, such as Johnsonville Night Lights in the Garden.

Plants offer a window into culture, lifestyle, faith, and tradition, as well as an opportunity to consider connections between communities. Southwest Florida and portions of Mexico share a tropical wet forest ecosystem and many overlapping plant species. Mexico is the birthplace of crops essential to cuisines around the world,

including corn, beans, and tomatoes. It harbors 10 percent of the world's flora, making it one of the most biodiverse places on Earth and underscoring Naples Botanical Garden's commitment to plant conservation throughout South Florida, Latin America, and the Caribbean.
