# Nature Journal

# What is a nature journal?

Draw one small part at a time and you'll be done before you know it!

A nature journal is a space where you can grow your thoughts, ideas, and imagination as you venture outdoors! Sketches, doodles, and note-taking are encouraged.

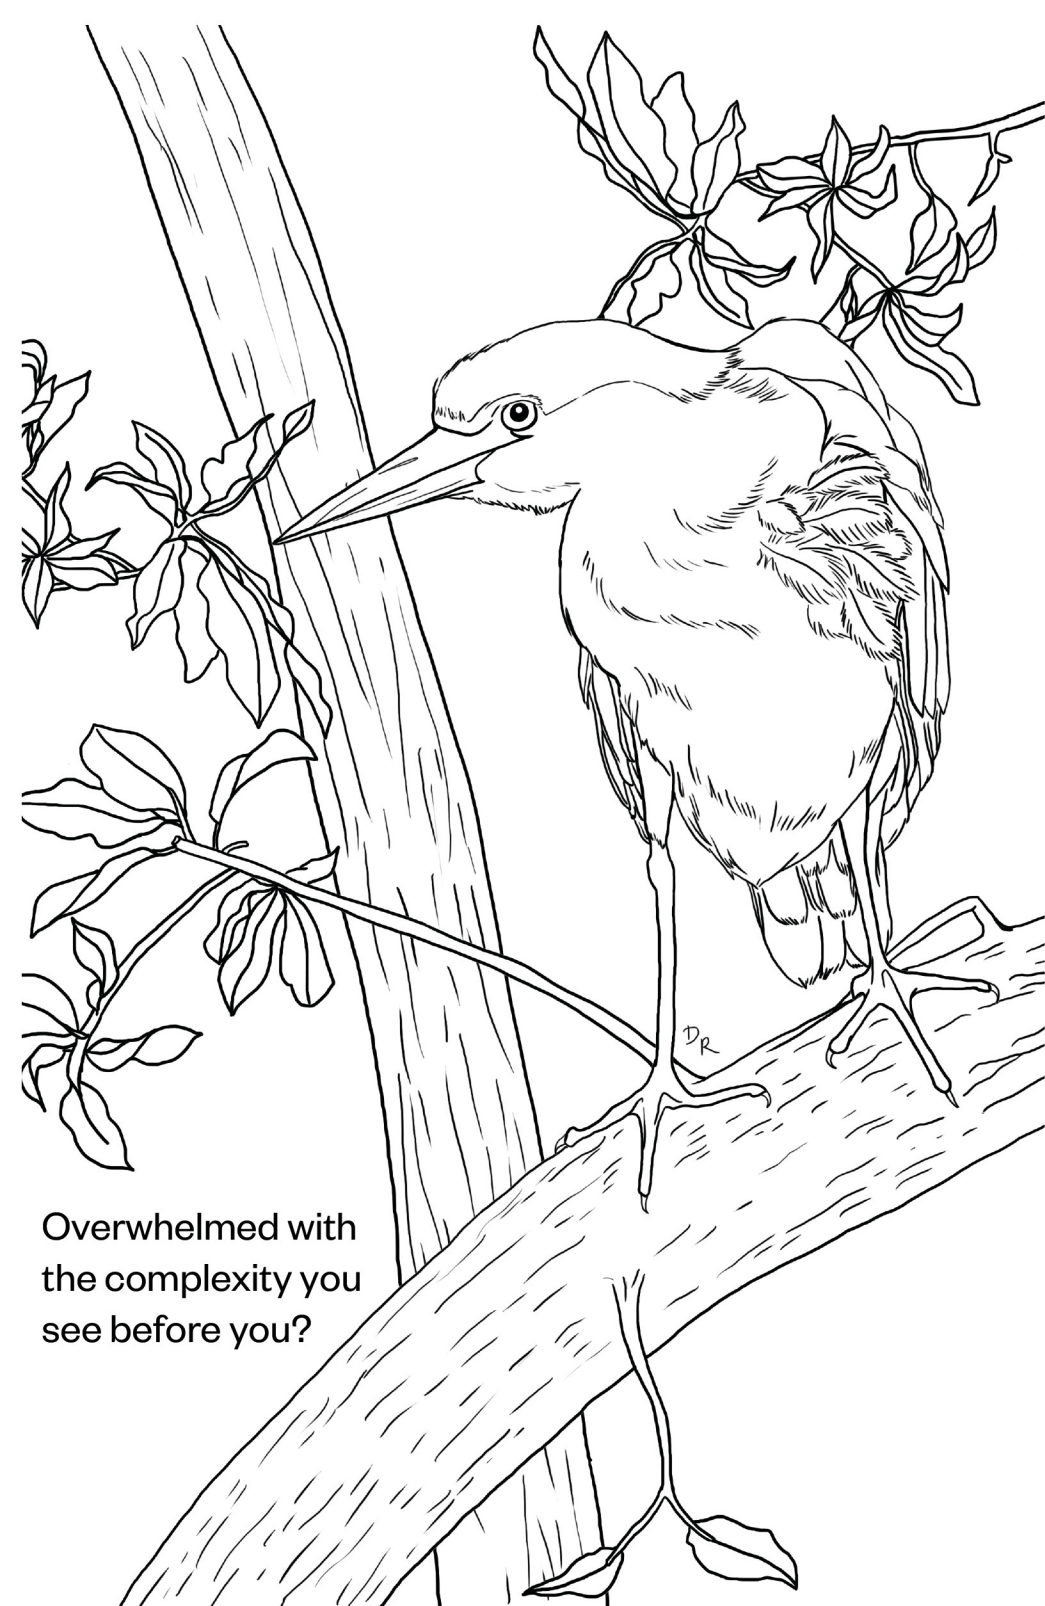

Use the prompts in this journal to connect with the nature that surrounds you in Naples Botanical Garden.

**This nature journal belongs to**

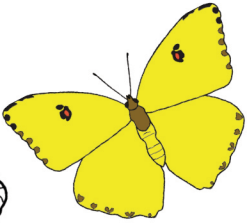

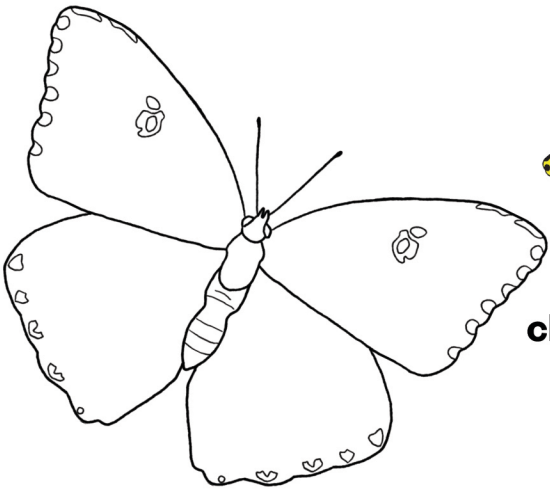

-----

Remember to look up, down, and all around  
when exploring the Garden.  
You may view something in a new way!

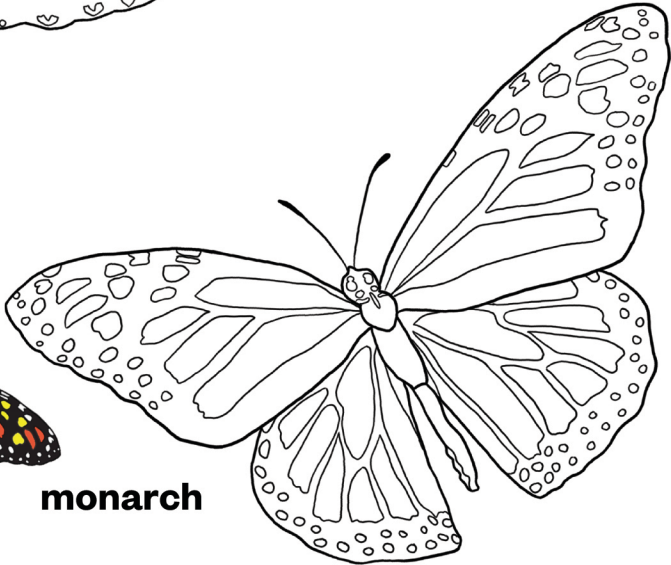

Overwhelmed with  
the complexity you  
see before you?

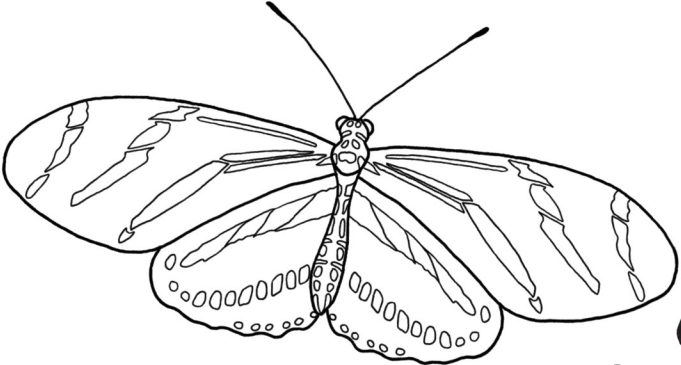

Don't be afraid to include written notes as you draw!  
These will be valuable reminders later.

**cloudless sulphur**

Northern Mockingbird (Mimus polyglottos)

- only mockingbird commonly found in North America
- omnivorous: eats insects and fruits
- known for its intelligence; a 2009 study showed that the bird is capable of recognizing individual humans

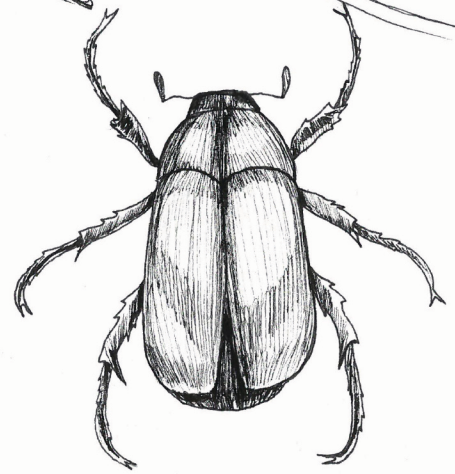

- recognize breeds; return to areas they had greater previous years; is observed most urban birds

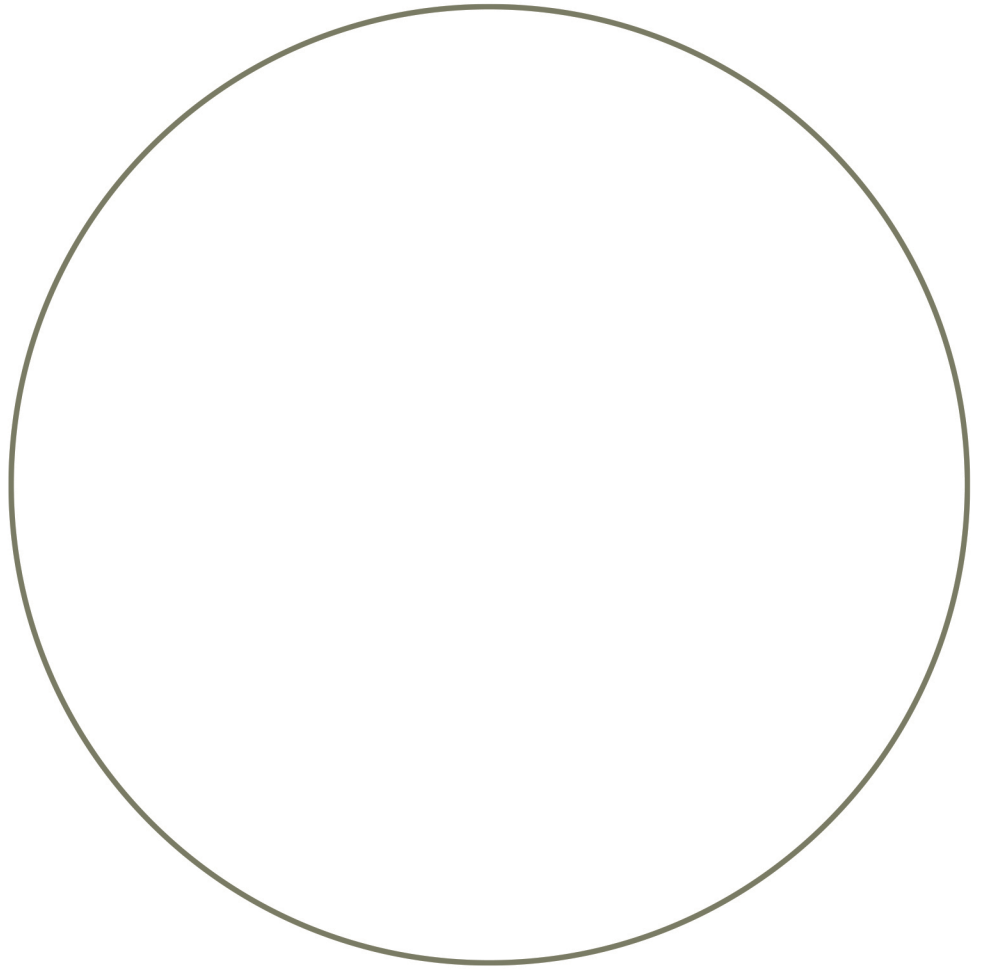

← state bird of Florida

- mockingbirds are capable many different songbird can also capable of imitating frogs, crickets, and artifacts such as squeaky wheels and

I might be this bird

If you were a butterfly, on which flower would you land?  
Draw your flower in the circle below!

If you were one-inch tall, where would you go  
in the Garden and what would you do?

Draw an image to accompany your story!
